LU-VE Presents CO₂ Research at IIR Conference

Stefano Filippini, director of the R&D Department of LU-VE Group, has been honored by the International Institute of Refrigeration (IIR) at the conclusion of the 6th Ammonia and CO₂ Refrigeration Technologies Conference held from April 16 to 18 2015, in Ohrid, Macedonia. Mr. Filippini received this recognition for his constant participation in and conspicuous contribution to the work of the conference over the years. In Ohrid, Mr. Filippini presented the results of work undertaken together with Umberto Merlo, manager of the LU-VE

Laboratory, entitled 'New generation of air-cooled heat exchangers for CO₂ applications'. The R&D laboratory of the Group is the largest in Europe in the sector and the only one capable of testing CO₂ equipment.
